South Louisiana Community College (SLCC)

Program Authorization: Constitution of 1974, Article 8, Sections 6 and 11; Acts 151 and 170 of 1998

Role, Scope and Mission

South Louisiana Community College (SLCC) provides multi-campus public educational programs that lead to: achievement of associate degrees of art, science, or applied science; transfer to four-year institutions; acquisition of the necessary career education and technical skills to participate successfully in the workplace and economy; promotion of economic development and job growth in south Louisiana; mastery of skills necessary for competence in industry specific to south Louisiana; completion of developmental or remedial educational requirements; cultural enrichment, lifelong learning and life skills.

The goals of the South Louisiana Community College are:

- 1. To provide a developmental education program to meet the basic skills needs of citizens in the SLCC delivery area.
- 2. To provide the support services to enable the institution to achieve its mission.

OBJECTIVES AND PERFORMANCE INDICATORS

Unless otherwise indicated, all objectives are to be accomplished during or by the end of FY 2002-2003. Performance indicators are made up of two parts: name and value. The indicator name describes what is being measured. The indicator value is the numeric value or level achieved within a given measurement period. For budgeting purposes, performance indicators are shown for the prior fiscal year, the current fiscal year, and alternative funding scenarios (continuation budget level and Executive Budget recommendation level) for the ensuing fiscal year of the budget document.

The objectives and performance indicators that appear below are associated with program funding in the Base Executive Budget for FY 2002-2003. Specific information on program funding is presented in the financial section.

Explanatory Note: Unless otherwise indicated, the Board of Regents provided the general performance information (GPI), endnotes and source documentation. Because data related to higher education changes frequently during an academic year, this table is accompanied by source citations as well as run dates. Occasionally figures provided by the Board of Regents differs from those cited by individual institutions. This difference is generally related to variations in calculation methodology. However, the Board of Regents, management boards and institutions are addressing this issue.

¹ The SREB system for categorizing postsecondary education institutions is designed for use in making statistical comparisons among states and is based on a number of factors relevant to determining resource requirements. Differences in institutional size (numbers of degrees), role (types of degrees), breadth of program offerings (number of program areas in which degrees are granted), and comprehensiveness (distribution of degrees across program areas) are the factors upon which institutions are classified. Institutions are assigned to categories for a report year using the previous academic year's data on program completions. To keep the statistical comparison groups relatively stable over time and to assure that institutions change categories only when their measures on a criterion are relatively stable, institutions change categories when they meet the criterion for another category for the third consecutive time.

- Two Year 1 Institutions awarding associate degrees and offering college transfer courses; some certificates and diplomas may also be awarded.
- ² As used in this document, admissions criteria (yes/no) denote whether the institution has any required criteria for admissions other than high school graduate or GED. Examples of admissions criteria would include a minimum standardized test score (ACT/SAT), a minimum high school grade point average, the successful completion of a prescribed set of high school courses, and ranking in the graduation class.
- ³ Student headcount is a national standard used throughout postsecondary education. Typically, as in Louisiana, it reflects the enrollment as of the 14th class day (nine for institutions utilizing the quarter system) in the fall term (semester/quarter).
- ⁴ Student full-time equivalent (FTE) is normally defined for a state or a region. In the Southern region, SREB re-defined how an FTE student is calculated in 1996. Currently, an FTE student is defined as 30 student credit hours earned during an academic year at the undergraduate level or 24 hours at the graduate level.
- ⁵ Degrees awarded/conferred refers to formal degrees and other awards (certificates/diplomas) conferred during an academic year. As defined by the Federal Government, the time frame covered in any cycle includes degrees/awards conferred between July 1st of one year and June 30th of the next. Not applicable indicates that no graduation occurred during this time period.
- ⁶ State dollars per FTE refers to the amount of money appropriated divided by the number of FTE students enrolled. The state dollars per FTE for Louisiana's institutions do not include certain non-formula items on formula campuses and do not include federal compliance funds. The data include library and scientific equipment funds for FY1997-98 through 2000-01.
- ⁷ Percentage of SREB benchmark refers to how the Louisiana institution compares with the average for that category of institution throughout the SREB region.
- 8a Undergraduate mandatory attendance fees refers to the amount of tuition and fees that an undergraduate must pay to attend that institution as an undergraduate student enrolled full-time, regardless of major. Particular degree programs may require additional fees. These are not included.
- 8b Percentage of SREB benchmark refers to how the Louisiana institution compares with the average for that category of institution throughout the SREB region.
- 9b Percentage of SREB benchmark refers to how the Louisiana institution compares with the average mandatory attendance fees for that category of institution throughout the SREB region.
- ¹⁰ Mean ACT score refers to the mean composite ACT score for first-time enrolled freshmen at that institution. It does not include scores of individuals who had their scores reported to the institution but who did not enroll.
- 11 Retention of first-time full-time freshmen from previous fall refers to the percentage of first-time full-time freshmen who enroll at a specific institution in a particular fall who re-enroll at that same campus in the subsequent fall.
- 12 Retention of first-time full-time freshmen from previous fall refers to the percentage of first-time full-time freshmen who enroll at a specific institution in a particular fall who re-enroll anywhere in Louisiana's public postsecondary education system (same or other institution) in the subsequent fall. (Does not include LTC)
- 13 The Board of Regents revised the definition of program accreditation rate in 1999. Considering the increased cost of seeking/maintaining program accreditation and the onerous requirements of some accrediting agencies, the Board of Regents and the Council of Chief Academic Officers initiated a yearlong process of examining the appropriateness and importance of program accreditation in those disciplines that offer accreditation. The process resulted in categorizing programs which can gain accreditation into three categories; mandatory, recommended and optional. The percentages reported in this document refer to those programs that appear in the category "mandatory". No data are reported in the years marked "Not Applicable" because the definitions and process changed in 1999, leaving previous years' data inappropriate and misleading.

¹⁴ The three/six-year graduation rate refers to the federal protocol for reporting graduation rates. These rates base students graduating in 150% of "normal" time, thus three years for those enrolled in associate degree programs at 2-yr schools and six years for those in bachelor's degree programs at 4-yr schools. The graduation rate reported includes only those students who earned a degree from the campus in which they originally enrolled and does not include any transfer student who graduated. No data are reported in the years marked "Not Applicable" because the definitions and process changed in 1997, leaving previous years' data inappropriate and misleading.

- 15 The ten-year graduation rate refers to a rate which the Board of Regents calculates using data from its Statewide Student Profile System and Completers System. Board of Regents' research indicates that the poverty rate (requiring most students to hold employment while in college), coupled with the educational attainment of the parents and need for developmental education, extends the time necessary to earn a degree. Additionally, the Board of Regents (as well as most states) believe that not including transfers who completed degree programs misrepresents the true graduation rates for the institutions and the state. Thus, the ten-year rate is a better measure of what actually occurs because it allows for the demographics of Louisiana and allows students who transfer within the state system to be included in the rate.
- ¹⁶ Electronic learning (distance learning) refers to technology-mediated instruction for students located at a site or sites remote from the instructor. Electronic learning includes both synchronous (real-time) and asynchronous (time-delayed) activities. The number of distance learning courses includes all courses offered through electronic delivery systems. These would include but not be limited to the use of compressed video, satellite, Internet, videocassette, and audiographics. Each course counts once, regardless of how many sites receive the course. The number reflects the courses that were offered during the fall term. No data collected in the years marked "Not Available".
- ¹⁷ The Office of Student Financial Assistance provided data on the number of TOP recipients to the Board of Regents. No data are reported in the years marked "Not Applicable" because TOPS was implemented in 1997.
- ¹⁸ An annual student satisfaction survey of currently enrolled students (using the ACT Student Opinion Survey instrument) is coordinated through the Board of Regents. Each 2-year and 4-year institution participates. The baseline for the survey was FY 99-00, therefore no data are available for the years marked "Not Applicable". Students rate "their college in general" on a five (5)-point satisfaction scale.
- i Data available by June 30, 2002.
